(a) $\|T\|_F$ under refinement
well (source)
leakage (zeroth order)
lens (principal part)
$\propto \sqrt{N}$
nodes N
(b) KL$(Q\|P) = \frac{1}{2}\sum(t - \log(1+t))$
nodes N
(c) all eigenvalues of T at N = 1024 (sorted)
leakage (zeroth order)
lens (principal part)
$K^{-2} - 1 = e^{-2} - 1$
fraction of modes
